Glass Slipper (an abstract of melting ice)

Abstract fine art images of nature that help you design environments that are peaceful, meditative, and evocative.

My photographs celebrate the physical and spiritual grace of the simplest elements of nature ~ leaves, seeds, twigs, and flowers. These compelling abstractions of light, color, and texture add the beauty and mystique of the natural world to any environment, making them perfectly suited for the calm and rejuvenating atmosphere of a resort, spa, or hotel.

Both thought-provoking and accessible, my artwork can either be a dramatic focal point for a lobby, or define an intimate and contemplative art gallery or meeting space.

To discuss how my art can contribute to your next design project, please contact my studio by phone 815-301-8836 or by email ds@danielsroka.com.

My artwork was chosen to create this contemplative art gallery within the lobby of the Spa at the Miraval Arizona Resort.
